## Projects

**Paw-Mart** |*MongoDB, React.js, Node.js, Express.js, REST API*| GitHub **Sep'26**

- Developed a responsive full-stack pet marketplace using React.js, Node.js, Express.js, and MongoDB, enabling users to explore dog breeds and browse pet listings.
- Implemented RESTful APIs, MongoDB CRUD operations, JWT authentication, and role-based access control to manage user accounts and secure admin functionality.
- Integrated Razorpay payment gateway (test mode) and developed an admin dashboard for managing pet bookings and adoption inquiries.

**Health-Prediction-System** |*React.js, MongoDB, Node.js, Express.js, Python, Random Forest*| GitHub **Jun'26**

- Engineered a machine learning-based disease prediction system using Python and Flask to analyse user-provided health indicators and generate predictive insights.
- Leveraged the Random Forest classification algorithm to recognize disease patterns and predict potential health conditions from structured medical datasets.
- Orchestrated an end-to-end prediction pipeline encompassing user input processing, data transformation, model inference, and result visualization through a web interface.

**Dynamic Gift Store** |*React.js, Node.js, MongoDB, Express.js* | GitHub **May'26**

- Crafted a responsive e-commerce platform using React.js, HTML, CSS, and JavaScript, enabling users to explore and browse a diverse range of gift products.
- Configured user authentication and account management with Node.js and Express.js to support secure access and user interactions.
- Enhanced the online shopping experience through interactive product displays, intuitive navigation, and mobile-friendly UI components.

## Training

**Data Structures and Algorithms** | **Certificate** **Jun'26 – Jul'26**

- Strengthened algorithmic problem-solving abilities by decomposing complex coding challenges into smaller, manageable components before implementation.
- Practiced fundamental data structures and algorithmic techniques by solving coding challenges and interview-oriented problems with a focus on time and space complexity.
- Applied pattern recognition and analytical reasoning to classify problems, identify suitable algorithms, and determine efficient problem-solving strategies.

## Certification

**Ai Database Certified Foundations Associate** | **Oracle** **Sep'26**
**Python Basics** | **Infosys** **Jul'26**
**Database Management System** | **Infosys** **Nov'25**

## Technical Skills

| | |
|---|---|
| **Programming Languages:** | C, C++, Java, Python |
| **Frontend Technologies:** | HTML, CSS, JavaScript, React.js |
| **Backend Technologies:** | Node.js, Express.js |
| **Databases:** | MongoDB, PostgreSQL |
| **Tools & Platforms:** | VS Code, Git, GitHub, Postman, MongoDB Atlas, Vercel, Render |
| **Soft Skills:** | Continuous Learning, Teamwork, Proactivity |

## Education

**Lovely Professional University** **Phagwara, Punjab**
Computer Science and Engineering - **CGPA: 7.71** *Aug'24 - Present*
**Narayana Junior College** **Anantapur, Andhra Pradesh**
Intermediate – **Percentage:93** Jun'22 - Apr'24
**New Montessori School** **Anantapur, Andhra Pradesh**
Matriculation – **Percentage:94** Apr'21 - Apr'22
